

Open research for impact

10 November - 15 December

From setting up ORCID and Zenodo to sharing your methodology as well as your data, this practical course introduces the tools and strategies of open research, alongside researchers from NORHED-funded universities across Africa.

By the end, you'll be able to

- 1 Use the appropriate open research tools and strategies to plan and carry out your research
- 2 Engage relevant stakeholders and communities in your research for societal impact
- 3 Design your research in a gender-responsive and participatory way
- 4 Communicate your research effectively with suitable audiences

What to expect

- Highly practical: come ready to test out ideas
- Books, videos, quizzes and discussion forums
- 5 weeks, 10–15 hours in total
- Optional 1-hour live Zoom session each week, or catch the recordings
- Thematic study clubs to network with colleagues
- Certificate of completion when you finish the materials

“

I have come to appreciate the accessibility spirit behind open research, the key characteristics of open the open research cycle, and that open research is about removing barriers to science and making knowledge a public good.
(Former course participant)

Ready to join?

Open research for impact is free for individuals at NORHED partner universities and runs on INASP's Moodle site.

- 1 [Create an account](#) or log in if you already have an account
